P R E F A C E

This list contains the titles of serial publications held in the General Library, in the libraries of the Departments of Botany, Entomology, Mineralogy, Palaeontology, (including Anthropology), Zoology, and in the Zoological Museum, Tring. It includes all titles received up to the end of June 1979, totalling some 20,000 entries.

Since the second edition of the list in 1975, over 2,600 new entries and 2,400 revisions have been made and it is estimated that about 17,000 Serial titles are now held in the Museum Libraries.

For the purpose of this list the term "serial publication" has been taken to include reports of expeditions and other works commonly known by their titles and issued in a number of parts over a period of time, in addition to periodicals in the stricter sense of the term.

Entries are arranged alphabetically, directly under title, and mainly in the language of the country of origin. Each title is followed by its appropriate abbreviation, details of library holdings and location. The abbreviations comply with the principles adopted in the fourth edition of the "World List of Scientific Periodicals". Each entry gives the date of the earliest volume held in the library. If this volume is not the first of the series its number is also given.

Cross-references are made from variant, alternative and translated titles. For ease of reference the German ä, ö and ü are arranged as a, o and u in the alphabetical sequence, not as ae, oe and ue. Diacritical marks and variant letters in other Western languages have been treated similarly. Cyrillic and Greek characters have been transliterated in accordance with B.S 2979: 1958 "Transliteration of Cyrillic and Greek characters" (British System) issued by the British Standards Institution.

August 1979

KEY TO LOCATIONS

Press-marks of serials held in the GENERAL LIBRARY are of two kinds: numbers with a prefix S. (e.g. S. 1301) indicating a serial located in the main serials collection; and plain classification numbers (e.g. 70 o C) indicating a serial located in the non-serials collection.

Press-marks of serials held in DEPARTMENTAL LIBRARIES follow a similar pattern but are preceded by the following initial letters:-

B = Botany

E = Entomology

M = Mineralogy

P = Palaeontology

P.A = Anthropology

Z = Zoology

T.R = Tring Museum Rothschild Library

T.B = Tring Museum Bird Section Library

T.G = Tring Museum General Natural History
